

The **Global Science Course (GSC)** is a new undergraduate 2 year-long transfer program. It was designed to enhance cross-cultural interactions among young minds from around the world coming together to learn science. All GSC classes are conducted in English by world-leading professors who are pursuing cutting-edge research in the most advanced fields, while also focusing on the fostering of students who will lead the next generation in science communities.

By giving students the opportunity to study abroad in Tokyo, they will not only get the chance to make the most of our world renowned facilities but will also be able to experience Japanese lifestyle and culture first-hand. This is an invaluable opportunity for those looking to expand their worldviews and experience something unique during their time as an undergraduate student.

Furthermore, successful applicants to our program are rewarded with a generous scholarship. This includes 150,000 Japanese yen per month to aid in paying tuition fees and support living expenses. It additionally includes fully supported rent.
