

E - Newsletter

Issue 4/2020, November 2020

<http://www.efce.org>

Dear members of EFCE,

Hello and welcome to the **latest EFCE newsletter**.

We are pleased to announce a series of webinars, organised by EFCE's working parties and sections, which will take place in late November and early December. The ten sessions, to be held between 23 November and 4 December, will cover topics as diverse as the Chemical engineering education during Covid, Challenges and opportunities of carbon capture and storage / utilization, and (BioH)pharma process system modelling, machine learning and digital twins. Registrations are open and attendance is free. For full details of the programme, please see the newsletter.

We are also delighted to share with you the date for the rescheduled CHISA conference, which will now take place as a virtual conference from 15-18 March 2021. As a taster, Prof Reinhard Job will deliver a webinar on 26 November on teaching electrochemical energy storage to engineers.

Elsewhere in the attached newsletter you will find the call for nominations for the 2021 Excellence Award in Thermodynamics and Transport Properties, links to the latest open access and freely available content from the EFCE's journals, a run down of upcoming events, and a link to EFCE's 2019 annual report.

We hope you find the newsletter engaging and useful and we look forward to welcoming you at one of our upcoming virtual events.

Meanwhile, stay safe,

Claudia
